

Mirror Dimension

Description: it is a special place to farm luck and steady 13dg stones, as well as others. It is important to remember that alchemy on the server is based on 13dg items, which is why stones are so important. Additionally, it is also possible to drop 13dg sun items and 15dg stones. Remember: it is important that the characters are between lvl 111 and 129 to have a good chance of dropping. It is recommended to leave the gap 9 from 111 to 129 to optimize your farm. **Access:** Through the Jangan teleport or through Constantinopolis, walking to the temple of Jupiter
